

Scuba Diving with Enriched Air Nitrox

The PADI Enriched Air Diver Course is PADI's most popular specialty scuba diving course, and it's easy to see why! Scuba diving with enriched nitrox gives you more no decompression dive time. This means more bottom time on all the dives!!!

Typically divers can stay longer and get wet sooner. It's an easy specialty and PADI Open Water Divers completing their 4th open water dive can do an introductory enriched air dive with an Enriched Air Instructor.

[Online Enriched Air Nitrox](#)

Now you can complete the Enriched Air online and complete the practical with us after you complete the eLearning module. Just click on the image below to affiliate with Al Mahara Diving Center and start your Enriched Diver online knowledge development. We will contact you to schedule your practical session and the enriched air dives within our area also unless you prefer the non diving option, either option, Al Mahara Diving Center is poised to assist you.
